Reach Initiative

Date: December, 2008 (modified January 2010, Reach Contact added)

As at June 2007, a European Regulation, (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals, summarised as "REACH" entered into force.

At this time Capital aluminium Extrusions Limited does not supply any products to our customers that require registration with Reach.

We have reviewed our manufacturing and do not have any products that we supply with a chemical content that requires Reach registration.

As any company, who is concerned with our environment, we are proactive in limiting any use of chemicals and we work closely with suppliers to monitor any of chemical usage and other materials to meet all current regulations.

If our monitoring in the future indicates a change in Reach status for any product we supply to customers, we will inform those customers accordingly and register that chemical/product with Reach.

Reach Contact, reach@capalex.com.

Sincerely

Peter Beasley
Managing Director

Complete solutions for extruded aluminium components

- high tolerance aluminium extrusions • wide range of alloys • machining • assembly • finishing • painting • anodising • alocroming • stock management •
